

## Precision Rotary Collet Stage

### FEATURES

- Continuous 360° rotation
- High resolution encoder
- Brushless DC motor
- Ø 5.00mm through bore
- Spring close, pneumatic open collet
- Accepts ER8 type collets

The RCS series rotary stages are designed for precise positioning and workholding to suit a variety of applications. The brushless direct drive technology eliminates backlash and improves reliability by eliminating sliding friction throughout the stage. The pneumatic open, spring close system allows for a range of collet sizes with exceptional runout capability.

The encoder has one index mark. It will output a pulse once per revolution when this index mark is passed. This pulse is highly repeatable and can be used to find an absolute position (within one revolution of the output shaft) upon power-up.
